

BROVA1

BROVA

BROVA

BROVA is arguably the finest and most exciting example of 21st century Norwegian ingenuity and capabilities.

BROVA combines a legacy of Norwegian maritime technology with Norway's world-famous cutting edge design, and its enduring pursuit for a greener future, to apply novel technologies in order to craft creative, innovative, and environmentally sustainable solutions to current, real and potential future challenges of the modern world.

BROVA stands at the forefront of environmental and design innovation, generating an entirely new landscape for the future of construction, with movable, durable, and versatile floating structures that are marvels of modern design and architecture.

With a forward-thinking philosophy that addresses current and potential geo-political, environmental and geographical challenges, BROVA is currently involved in a number of projects and continues to develop new concepts and ideas while implementing the latest in design, energy, sustainability and technology into its plans.

At the bedrock of its ideas is the 'Pearl' concept – a totally sustainable floating superstructure currently being utilized for the hospitality industry with two hotels currently planned, but with enough versatility to develop into any construction project.

BROVA I

A SHIP, A STAGE AND A THEATER.

Brova is underway with a number of projects, where the use of novel ideas and technologies has been the common denominator.

Working on exiting projects, Brova is all times developing new ideas, with continually improving and implementing the newest technology.

Therefore, meet Brova I, a ship, a stage and a theater.

Brova I is new, it is unique, it will make a impact.

THE IDEA

Brova I is new! The idea of a stage and Theater moving from city to city gives new and unique possibilities.

A band on tour can have the same stage and ringing along for new concerts every day in a new city. The artists have the choice to seil along, with all advantages of luxury cruise. Safe environment and relaxing atmosphere.

Mass concert for the audience at shore in front to the main stage, or private concerts to the VIPs in the theater.

It is only our fantasy that limits usage of the ship:

- Artist tours
- Promotional tours
- Bringing musicals to different City's
- Supporting city's in organization of events type World Cup in football, Olympics...
- Arrangements type Volvo Ocean Race

FACTS: STAGE AND ENTERTAINMENT

OUTDOOR STAGE 25 X 12 X 16M

- 2 off open side doors each with 12 x 12m LED screens
- 3 off 6 x 6m LED screens on top deck
- Versatile supports for extensive audio system
- Stage 5,5m above waterline with vessel at 5m draught

INDOOR STAGE 16 X 9 X 14M

- Fully equipped with lighting-, audio- and screen systems
- 850 seats in concert hall for onboard concerts

DECK

- 150m² VIP lounge on top deck
- 700m² mingling area on open top deck
- 180m² lobby on each of three decks

TECHNICAL FEATURES

VESSEL: TECHNICAL FEATURES

- 60 persons onboard during sailing
- 12 Passengers (artists and guests)
- 20 Crew
- 28 Special Personnel (stage crew / concert technicians)

CABINS & SUITES

- 2 Large Suites
- 7 Suites with double beds
- 39 one person cabins and 2 cabins with 2 beds

VESSEL: TECHNICAL FEATURES

- Length Overall (Loa)- 94m
- Breadth (B) - 22m
- Draught - 5m
- Air draught (with vessel at 5m draught) - 25m
- 3 Main generators each 1800kW – MGO fuel only
- 1 main azimuth propulsion unit 3000kW
- 1 combined retractable azimuth thruster /side thruster - 880kW
- Economical speed 12kn, maximum speed 14kn
- 20 days endurance
- 3000kWhr battery capacity for concerts 3 to 5 hrs
- Shore connection for full concert demand and battery charging
- Seamless transition between power sources: batteries – shore power – vessel's generators

- 850 SEATS
- 25x12x15m OI
- 5 METER DRAUGHT
- 25 METER HIGH

Green room, climate conditioned instrument storage room.

Open aft stage door with 12x12m LED screens and audio systems.

Retractable stage floor.

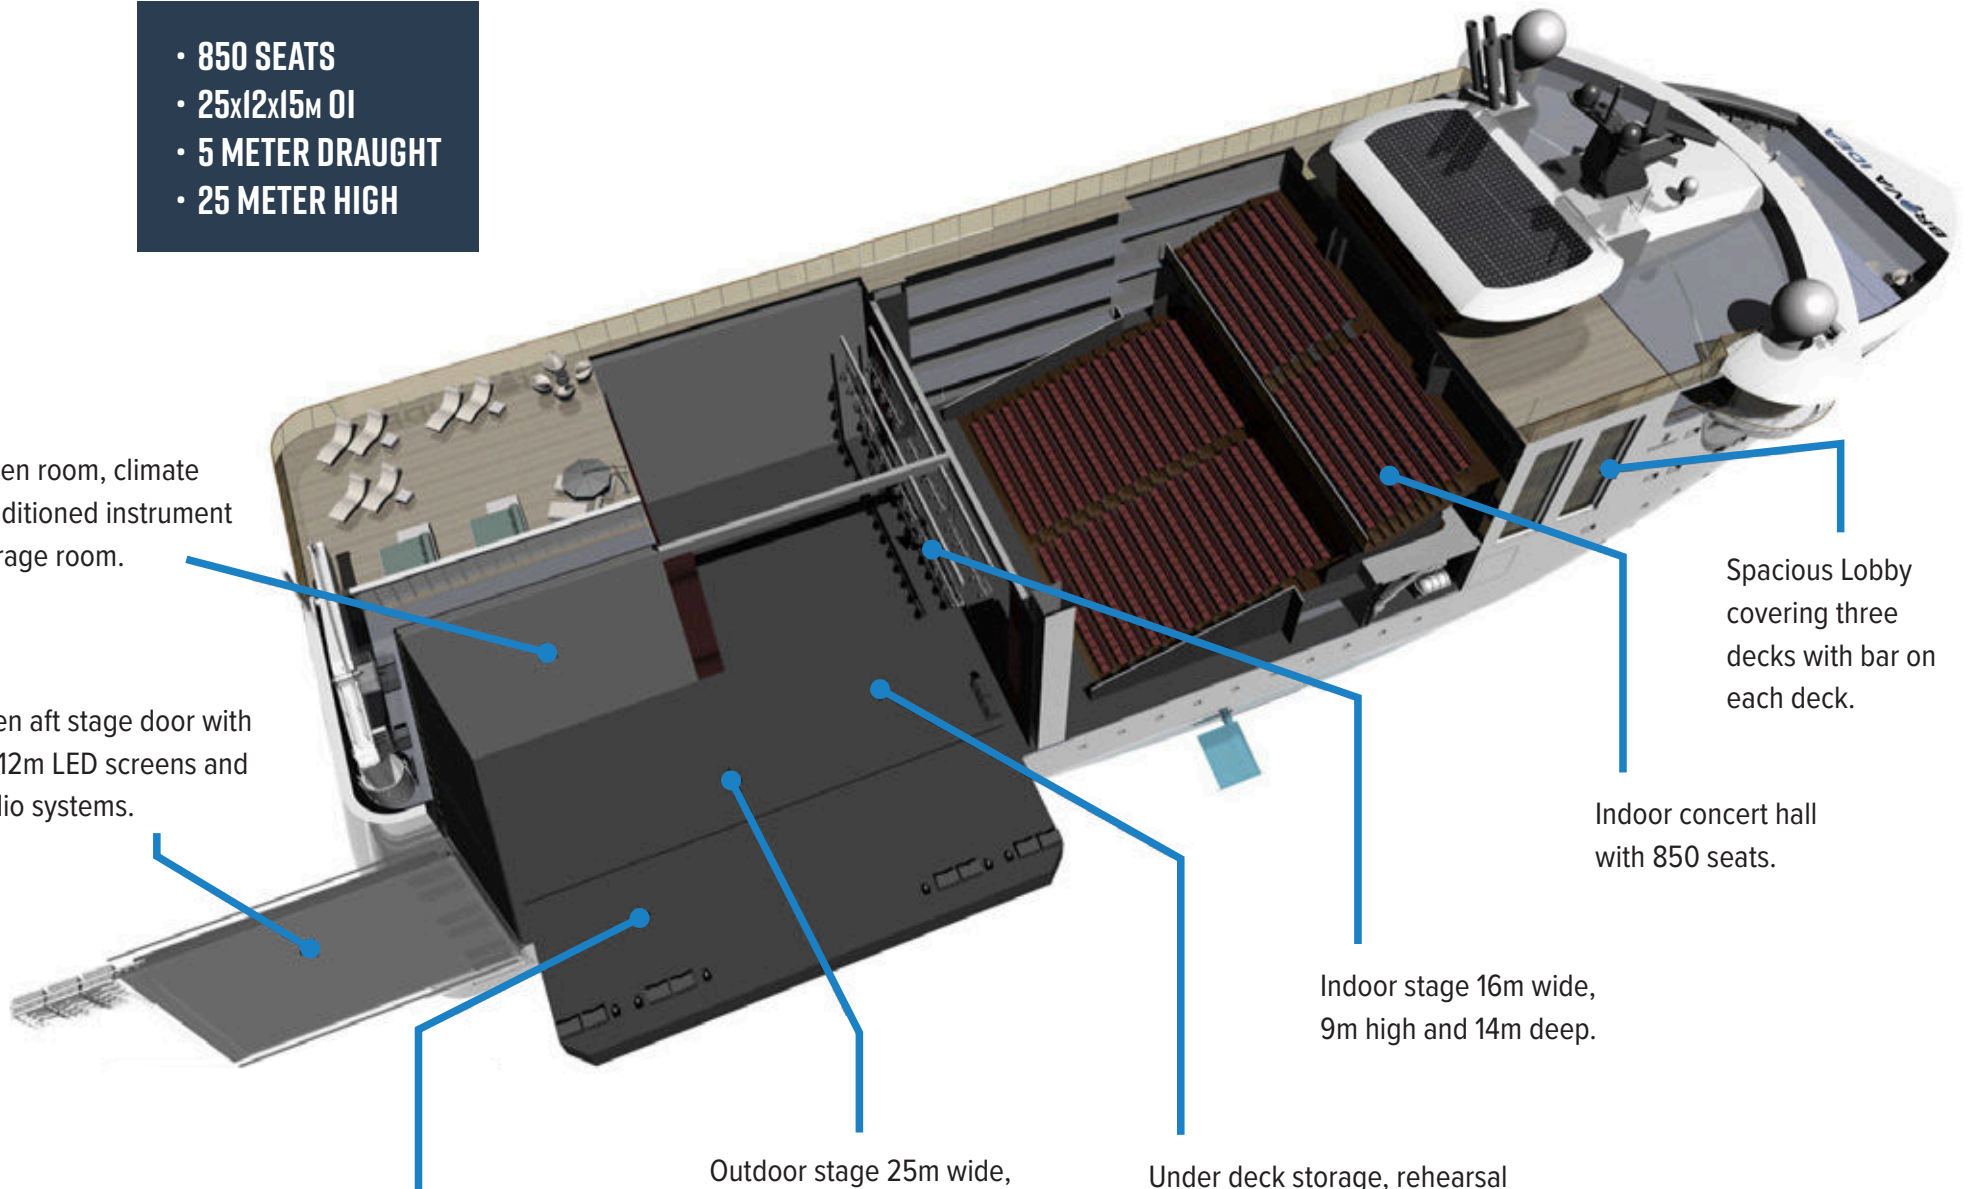

Outdoor stage 25m wide, 12m high and 16m deep.

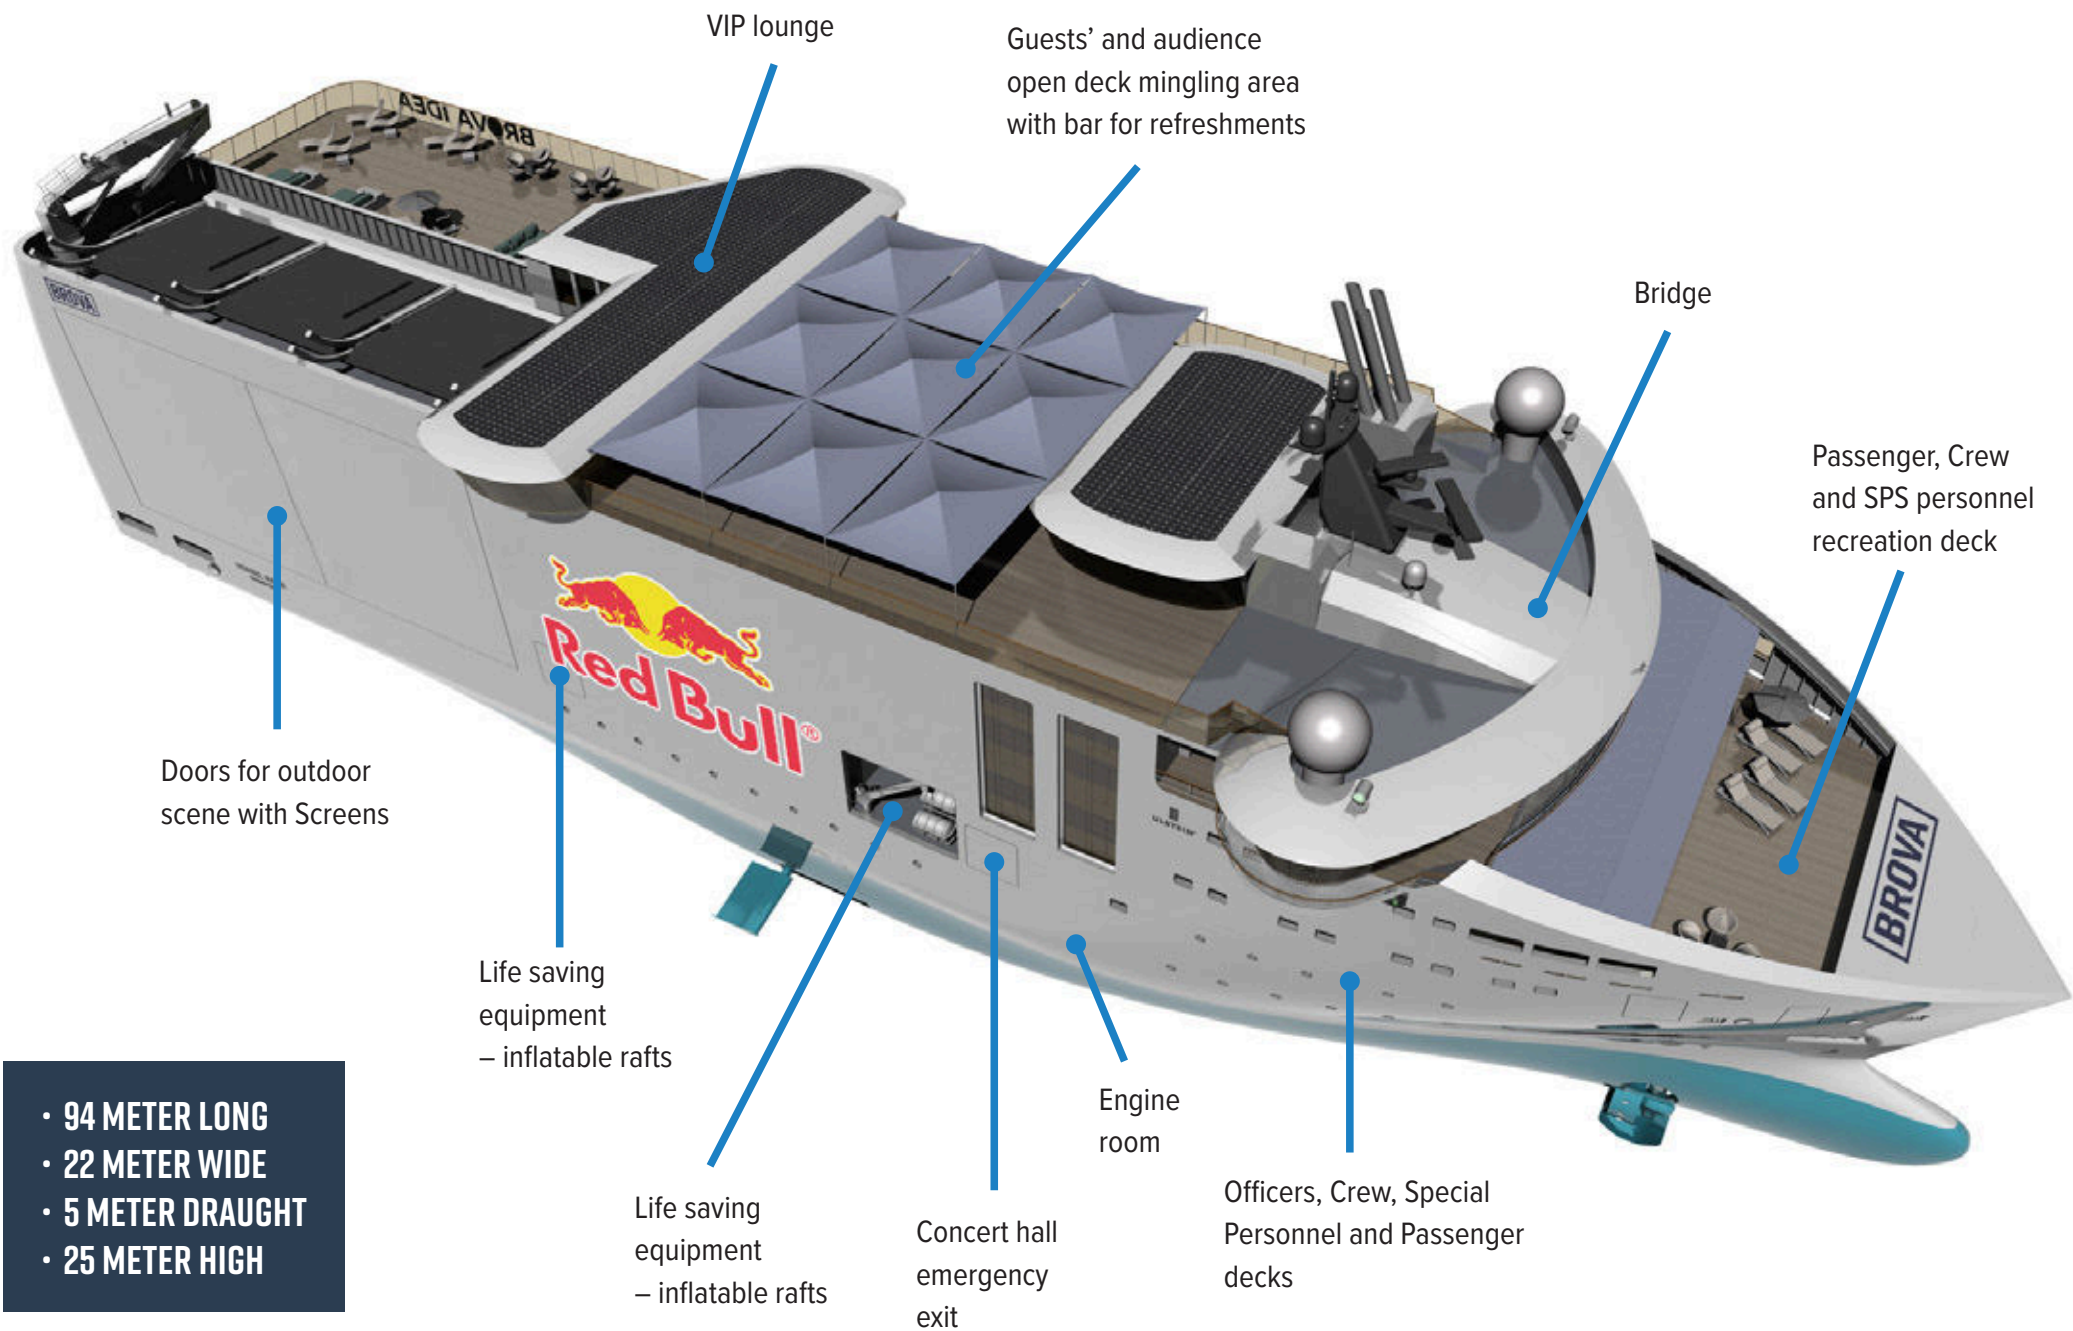

Under deck storage, rehearsal rooms, workshops and technical installations.

Indoor stage 16m wide, 9m high and 14m deep.

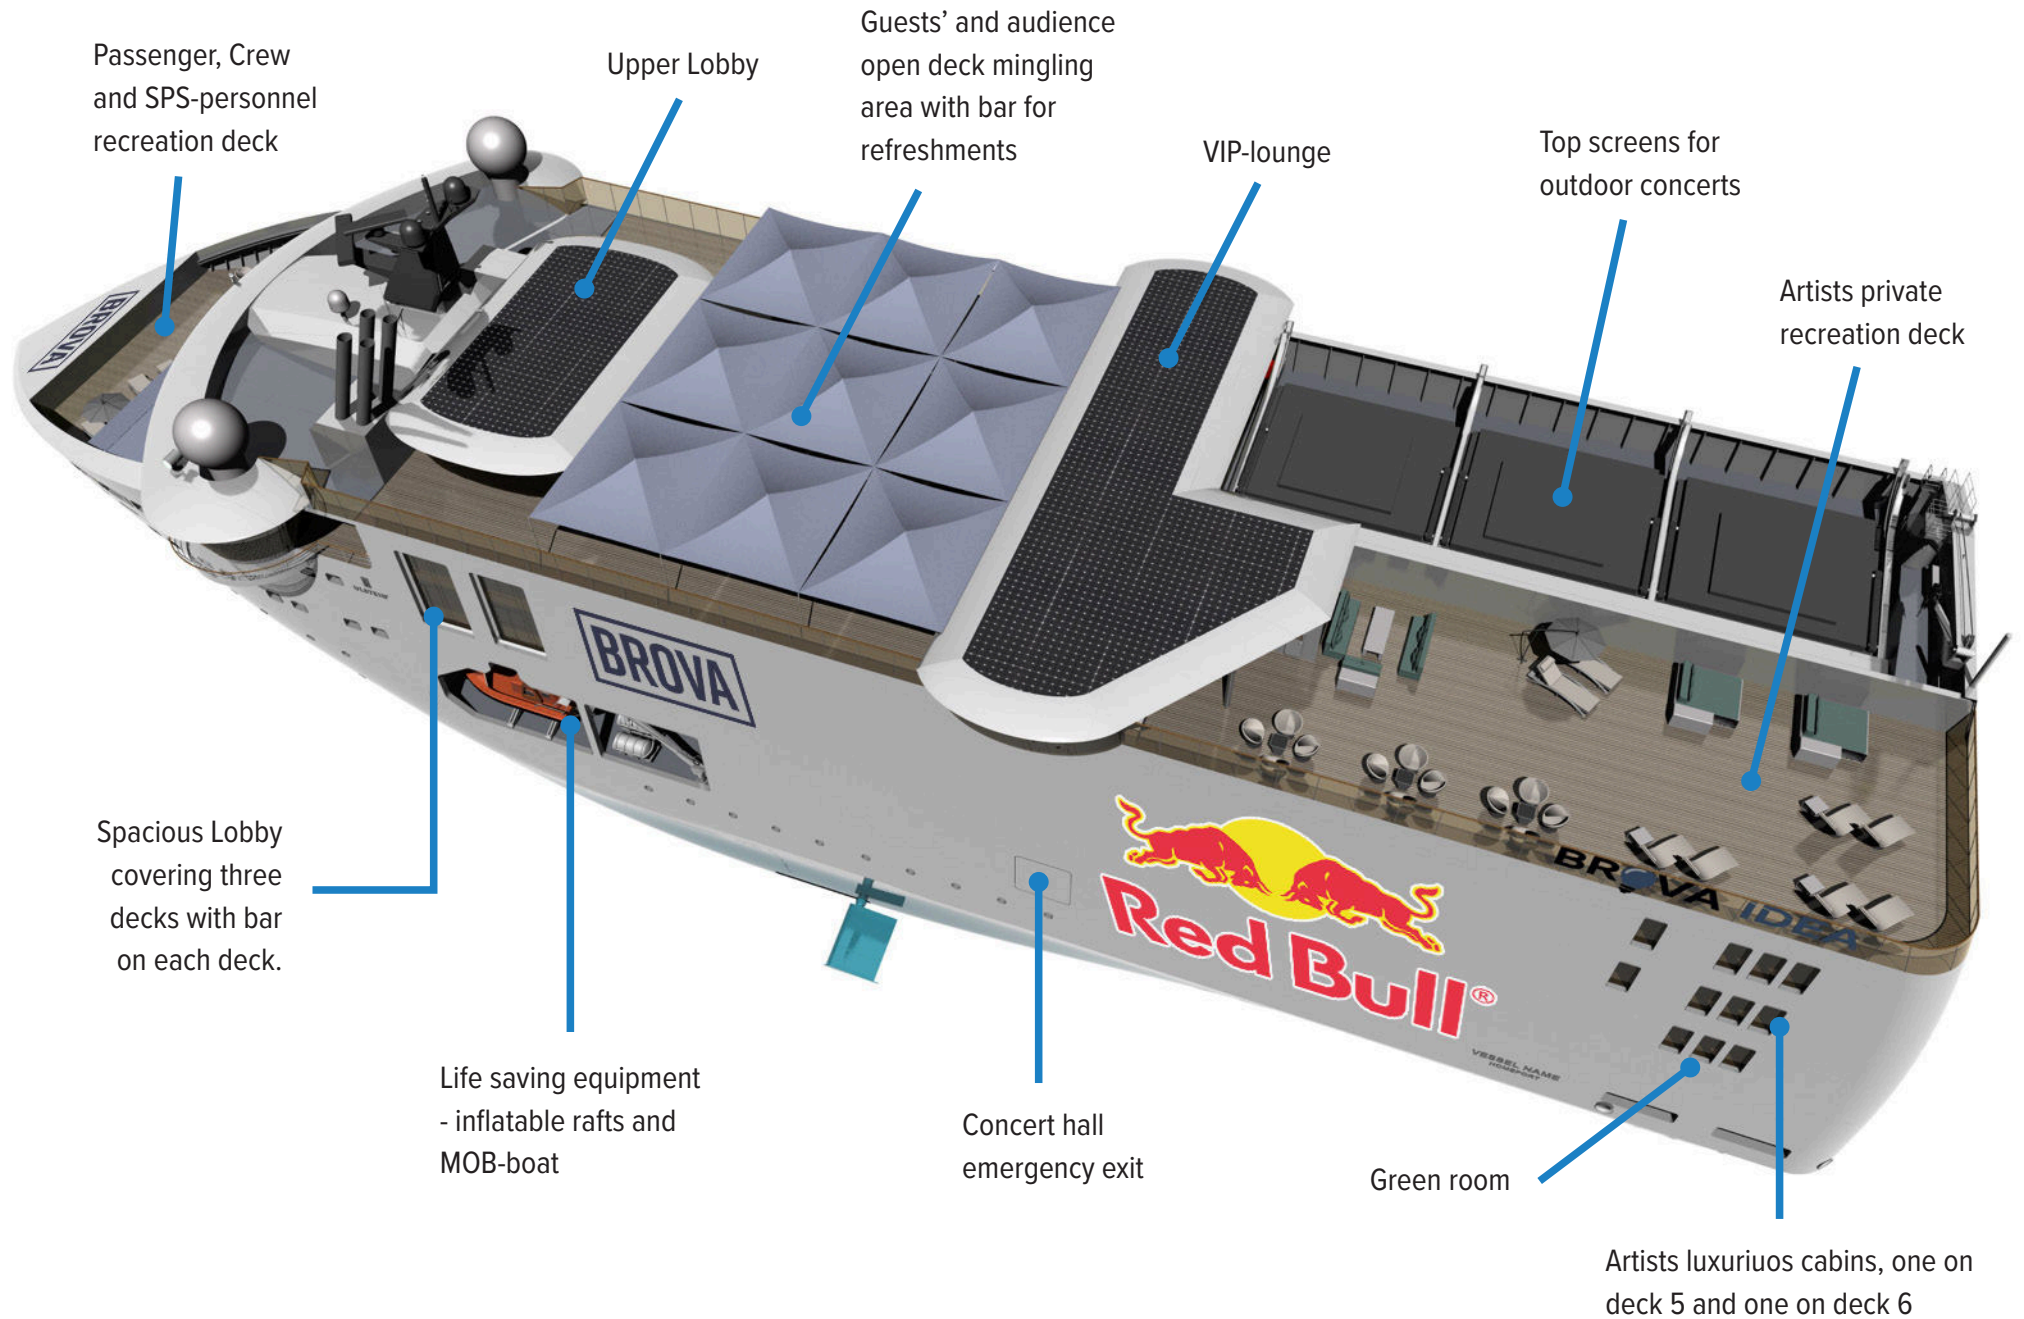

Indoor concert hall with 850 seats.

Spacious Lobby covering three decks with bar on each deck.

- 94 METER LONG
- 22 METER WIDE
- 5 METER DRAUGHT
- 25 METER HIGH

With average speed the ship has a radius of 270nm/500km during 20 Hours Brova 1 can arrange routes that will satisfy needs for any tour arrangements.

To illustrate: Oslo – Copenhagen = 270 nm
